River Publishers

Advancement of Optical Methods & Digital Image Correlation in Experimental Mechanics, Volume 3

Proceedings of the 2018 Annual Conference on Experimental and Applied Mechanics

Editors:

Luciano Lamberti, The Society for Experimental Mechanics, Bethel, USA,

Ming-Tzer Lin, The Society for Experimental Mechanics, Bethel, USA

Cosme Furlong, The Society for Experimental Mechanics, Bethel, USA

Cesar Sciammarella, The Society for Experimental Mechanics, Bethel, USA

Phillip L. Reu, The Society for Experimental Mechanics, Bethel, USA

Michael A Sutton, The Society for Experimental Mechanics, Bethel, USA

Advancement of Optical Methods & Digital Image Correlation in Experimental Mechanics, Volume 3 of the Proceedings of the 2018 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the third volume of eight from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on a wide range of optical methods ranging from traditional photoelasticity and interferometry to more recent DIC and DVC techniques, and includes papers in the following general technical research areas:

- New Developments in Optical Methods & Fringe Pattern Analysis;
- DIC Applications for Challenging Environments;
- Optical Methods in SEM: History & Perspective;
- Mechanical Characterization of Materials & Structures with Optical Methods;
- Bioengineering.
