River Publishers

Advancement of Optical Methods & Digital Image Correlation in Experimental Mechanics, Volume 2, 2026

Editor: Motoharu Fujigaki, University of Fukui, Fukui, Japan
Gordon Shaw, National Institute of Standards and Technology, MD, USA
Johan Hoefnagels, Eindhoven University of Technology, Eindhoven, Netherlands

Advancement of Optical Methods & Digital Image Correlation in Experimental Mechanics, Volume 2 of the Proceedings of the 2026 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the second volume of five from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on a wide range of optical methods ranging from traditional photoelasticity and interferometry, DIC and DVC techniques, and newer advances in photonics. Included are papers in the following general technical research areas:

- Advancement of Optical Methods in Experimental Mechanics
- Digital Image Correlation Techniques
- Localized Spectrum Analysis for Fracture Studies
- Direct Optical Strain Measurement
- High-Speed Imaging Combined with Thermal Analysis
- Innovations in Full-Field Measurement and Data Fusion Approaches
