

Security, Privacy and Reliability in Computer Communications and Networks

Editors:

Kewei Sha, University of Houston, Clear Lake, USA

Aaron Striegel, University of Notre Dame, USA

Min Song, Michigan Tech, USA

Future communication networks aim to build an intelligent and efficient living environment by connecting a variety of heterogeneous networks to fulfill complicated tasks. These communication networks bring significant challenges in building secure and reliable communication networks to address the numerous threat and privacy concerns. New research technologies are essential to preserve privacy, prevent attacks, and achieve the requisite reliability.

Security, Privacy and Reliability in Computer Communications and Networks studies and presents recent advances reflecting the state-of-the-art research achievements in novel cryptographic algorithm design, intrusion detection, privacy preserving techniques and reliable routing protocols.

Technical topics discussed in the book include:

- Vulnerabilities and Intrusion Detection
- Cryptographic Algorithms and Evaluation
- Privacy
- Reliable Routing Protocols

This book is ideal for personnel in computer communication and networking industries as well as academic staff and collegial, master, Ph.D. students in computer science, computer engineering, cyber security, information insurance and telecommunication systems.

River Publishers Series in Communications and Networking

ISBN: 9788793379893

e-ISBN: 9788793379909

Available From: December 2016

Price: € 85.00 \$ 110.00

KEYWORDS:

Computer Security; Network Security; Privacy; Reliability; Cryptographic Algorithms; Computer Networks; Computer Communications; Intrusion Detection; Network Routing
