

River Publishers Series in Electronic Materials, Circuits and Devices

Advanced Tutorial on Analog Circuit Design

Editors:

Milin Zhang, Tsinghua University, China
Zhihua Wang, Tsinghua University, China
Jan Van der Spiegel, University of Pennsylvania, USA
Franco Maloberti, University of Pavia, Italy

e-ISBN: 9781003388524

Available From: August 2023

Price: € 110.00

Description:

This book is a summary of analog circuit design related lectures from IEEE Advanced CMOS Technology School (ACTS) 2019. The topics cover continuous-time delta-sigma data converter, switched-capacitor power converter, ADC and power management IC. The slides are selected from the handouts, while the text was edited according to the lecturers talk.

ACTS is a joint activity supported by the IEEE Circuit and System Society (CASS) and the IEEE Solid-State Circuits Society (SSCS). The goal of the school is to provide society members as well researchers and engineers from industry the opportunity to learn about new emerging areas from leading experts in the field. ACTS is an example of high-level continuous education for junior engineers, teachers in academe, and students. ACTS was the results of a successful collaboration between societies, the local chapter leaders, and industry leaders.

Keywords: Continuous-time Delta-Sigma Data Converter, Switched-Capacitor Power Converter, ADC, Power Management IC.
