

River Publishers Series in Automation, Control and Robotics

## Behavioural Types: from Theory to Tools

**Editors:**

Simon Gay, University of Glasgow, UK  
António Ravara, Universidade Nova de Lisboa, Portugal

**ISBN:** 9788793519824

**e-ISBN:** 9788793519817

**Available From:** June 2017

**Price:** € 85.00

### Description:

Behavioural type systems in programming languages support the specification and verification of properties of programs beyond the traditional use of type systems to describe data processing. A major example of such a property is correctness of communication in concurrent and distributed systems, motivated by the importance of structured communication in modern software.

*Behavioural Types: from Theory to Tools* presents programming languages and software tools produced by members of COST Action IC1201: Behavioural Types for Reliable Large-Scale Software Systems, a European research network that was funded from October 2012 to October 2016. As a survey of the most recent developments in the application of behavioural type systems, it is a valuable reference for researchers in the field, as well as an introduction to the area for graduate students and software developers.

**Keywords:** Programming languages; behavioural type systems; choreography; program analysis tools; session types; software contracts; automation
