Green Web-II: Standards and Perspectives from the IUCN Program/ Policy Development in Environment Conservation Domain

with reference to India, Pakistan, Nepal, and Bangladesh: Second Edition

Author: Medani P. Bhandari, Akamai University, Hawaii, USA and Sumy State University, Ukraine

ISBN: 9788770221924

e-ISBN: 9788770221917

Available From: July 2020

Price: € 95.00

Description:

This second edition of the book, "Green Web-II: Standards and Perspectives from the IUCN Program / Policy Development in Environment Conservation Domain- with reference to India, Pakistan, Nepal, and Bangladesh" investigates the IUCN's role in global biodiversity conservation policy as well as in national program development in India, Pakistan, Nepal and Bangladesh. It explores how nature protection priorities and approaches are promoted or addressed by IUCN, and how environment conservation policies are created and maintained in states of South Asia with different capacities. It also evaluates IUCN's competency in biodiversity, climate change, nature conservation and environmental policy formulation at the global, regional and country levels. This book adds to our knowledge firstly by contributing to a small but growing body of work on the sociology of international organizations. International Governmental Organizations (IGOs), have previously been mainly the subject of political science. Secondly, it critically explores one of the largest and most active nature conservation organizations in the world. Thirdly, it also explores how IUCN actually goes about building protectoral programs with individual member nations. Finally, the research also shows the historical development of global institutions and IUCN's activities with member nations in helping to define or redefine the concept of global governance. The outcomes of this research will also be beneficial for global collaboration, networking, and for the identification of common concerns among the many environmental and conservational organizations at the international and national level. In this broader sense, the research outcomes might be beneficial to constituencies of the global North as well as global South because of the nature and coverage of IUCN and its role in conservation policy formation. This effort may serve as a model for additional research on international organizations.

Technical topics discussed in the book include:

- The Motivation for Environmental Conservation- How personal efforts make a difference
- The Role of International Environment Conservation Organizations
- The Political Economy of Organizations, Network theory, Institutional theory, Stakeholder theory, Governance theory
- Governance performance and Competitiveness
- Popularity indices
- Knowledge creation and diffusion
- Conservation commons

Keywords: IUCN, Environment Conservation, Conservation Strategy, Resolution formation and implementation, Sustainable Development, Biodiversity -Forest Conservation, Park Management, Environmental Governance, Conservation Commissions, India, Nepal, Bangladesh and Pakistan, Climate Change- Problems and consequences
