

River Publishers Series in Electronic Materials, Circuits and Devices

Advances in Highly Correlated Systems

Editors:

Parvathy Nancy, Mahatma Gandhi University, India

Saju Joseph, Mahatma Gandhi University, India

Wilfrid Prellier, French National Centre for Scientific Research, France

Sabu Thomas, Mahatma Gandhi University, India

ISBN: 9788770224116

e-ISBN: 9788770224109

Available From: September 2022

Price: € 95.00

Description:

Advances in Highly Correlated Systems explores the fundamentals, recent advances, and applications of the physics of highly correlated materials. This book serves as a handbook/reference for advanced graduate students.

- Provides fascinating insights into the major developments and applications of strongly correlated materials.
- Integrates various numerical/theoretical models, such as dynamic mean-field theory, Hubbard model, Ab-Initio Calculation etc.
- Encompasses a useful experimental and theoretical basis for students, researchers, and scientists.

Keywords: Dynamical mean field theory (DMFT), Quantum Magnetism and Frustration, Topological aspects; Multiferroics, Electronic and spintronic devices.
