### **Editors:**

Dr. S.Kannadhasan, Study World College of Engineering, Tamilnadu, India

Dr. Alagar Karthick, K.P.R. Institute of Engineering and Technology, Tamilnadu, India

Dr. R. Nagarajan, Gnanamani College of Technology, Tamilnadu, India

Welcome to the International Conference on Materials, Computing and Communication Technologies [ICMCCT 2022] held at Cheran College of Engineering, Karur, Tamilnadu, India on 20 August 2022. Artificial neural networks, fuzzy logic, fuzzy neural networks, expert systems, genetic algorithms, and communication are some of the methodologies and techniques that are commonly used to build intelligent, automated, and secure systems. The main purpose of ICMCCT 2022 is to promote intelligent technologies such as fuzzy logic, neural networks, support vector machines, evolutionary computing, machine learning, and probabilistic reasoning for addressing real-time problems. At ICMCCT 2022, researchers, professors, students, and professionals in the domains of engineering and technology will have a world-class forum to showcase their work, expertise, innovative ideas, and discoveries. A fascinating technical programme will be on show. The programme will include research presentations, keynote lectures, invited talks, tutorials, panel discussions, and poster presentations. In all areas of soft computing, we're searching for innovative ideas. Submissions from academia, government, and industry are all welcome. Submissions for technical papers, workshop/special session ideas, and tutorial proposal submissions are now open. Its goal is to provide a great platform for professors, researchers, and scholars from all over the world to present the most recent innovative research results as well as the most recent developments and trends in the fields of Electrical, Electronics, Information, Computer, and Communication Technology. The goal of ICMCCT 2022 is to stimulate communication between scholars and practitioners working in a broad range of engineering and technology fields. A large number of people are expected to attend ICMCCT 2022 to present research findings, discuss views and ideas, learn about new technologies, and extend their professional and social networks. ICMCCT 2022 will be held entirely online, with the authors presenting their papers. Original research papers (not under consideration for publication elsewhere) reporting novel theoretical and/or experimental research discoveries in the following tracks (but not limited to) are welcomed to be submitted in standard IEEE conference template by prospective authors.
