Model Validation and Uncertainty Quantification, Volume 3

Proceedings of the 32nd IMAC, A Conference and Exposition on Structural Dynamics, 2014

Editor: H. Sezer Atamturktur, The Society for Experimental Mechanics, Bethel, USA

This third volume of eight from the IMAC - XXXII Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Structural Dynamics, including papers on:

- Linear Systems
- Substructure Modelling
- Adaptive Structures
- Experimental Techniques
- Analytical Methods
- Damage Detection
- Damping of Materials & Members
- Modal Parameter Identification
- Modal Testing Methods
- System Identification
- Active Control
- Modal Parameter Estimation
- Processing Modal Data
