Blockchain and AI Amalgamation for IoT Applications Beyond 5G

Editors:

Sudeep Tanwar, Marwadi University, Rajkot,India

Maniklal Das, Dhirubhai Ambani Institute of Information and Communication Technology, India

Abderrahim Benslimane, Avignon University, France

Rajesh Gupta, Marwadi University, Rajkot, India

Blockchain and AI Amalgamation for IoT Applications Beyond 5G explores how blockchain, AI, and 5G converge to secure, scale, and transform IoT. Covering privacy, predictive security, edge devices, vehicles, and the metaverse, it offers both theory and real-world applications.

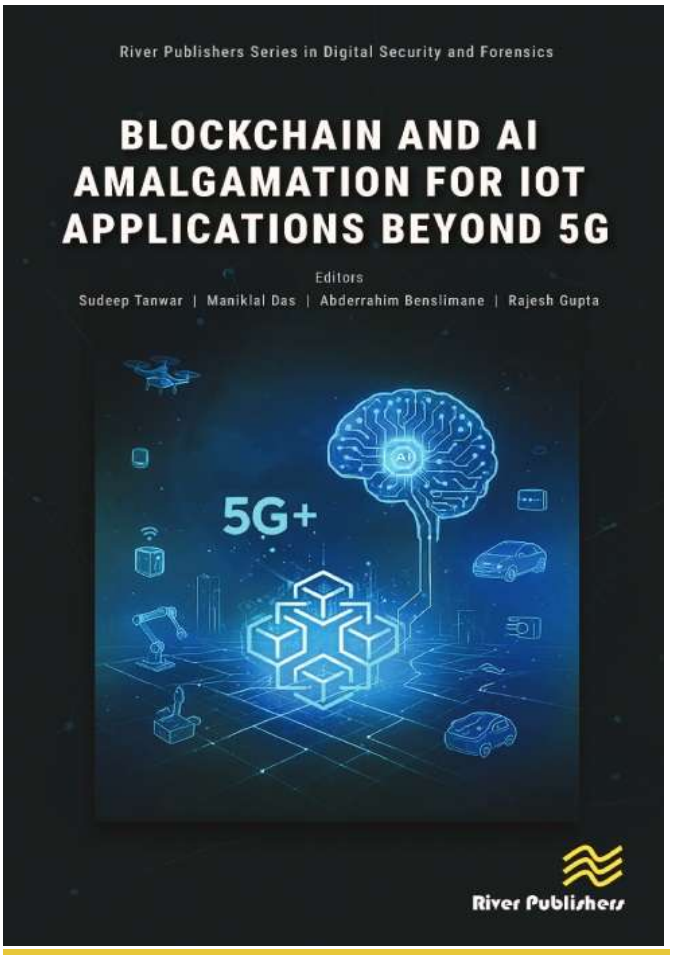

TABLE OF CONTENTS

Part 1 Laying the Foundation: Blockchain and AI Amalgamation in 5G-IoT
1. Introduction of Blockchain and 5G-enabled IoT Devices
R. Venkatesh
2. A Review on Blockchain-enabled Decentralized Architecture in a 5G-IoT Network
Keshini R Trivedi
3. Integrating Blockchain and IoT: Opportunities, Challenges, and Applications
N Rajkumar, C Viji, Balusamy Nachiappan, A Mohanraj, N Karthikeyan, and Judeson Antony Kovilpillai J
4. Case Studies and Prototypes for Blockchain and Artificial Intelligence (AI) Integration in 5G-Enabled (IoT) Systems: Towards Secure, Intelligent, and Efficient Paradigms
Khalid Aziz, Sakshi Dua, and Prabal Gupta

Part 2 Security and Privacy Enhancement in 5G-IoT Using Blockchain and AI
5. Enhancing Data Security and Privacy in 5G-IoT Using Blockchain Technology
Rohit Malik, Sakshi Dua, Preety Shoran, Prabal Gupta
6. Interconnected Integrity: Securing IoT Networks with Blockchain Technology
Sartaj Singh, Shilpa, Sandeep Kaur, and Rishi Kumar
7. An Adaptive Approach for Cloud Security Using Cloud Service Tool, Blockchain, Protocols and Algorithms
Sheetal Kumar Dixit, Rahul Jain, Madhuri Bhavsar, and Preeti Kathiria
8. Blockchain-enabled VPN Security
Nidhi Bangar, Jaskeerat Kaur, and Nitin Rathore

Part 3 Intelligent Decision Making and Automation for 5G-IoT Systems Powered by Blockchain and AI
9. Smarter Security: Blockchain and AI-driven Identity Management for Next-Generation IoT
Neel Dedkawala, Priyal Bhinde, Rajesh Gupta, and Sudeep Tanwar
10. Enabling Automated Network Services Using Zero-touch Technology for Intelligent 5G-IoT Communication
Roshni Pankaj Kumar Rana, Nitin Rathore, and Aparna Kumari
11. Blockchain and AI Integration for Enhanced Security and Intelligence in 5G-IoT
Yash Koshti, Rahul Jain, Deepak Kumar Mehta, Sejal Mishra, and Nitin Varshney
12. Enhancing Environmental Monitoring and Sustainability through 5G-IoT Integration with AI and Blockchain
Heena Khanna, Sartaj Singh, Manik Mehra, and Akshay Sahnan

Part 4 Applications of Blockchain and AI in 5G-IoT
13. Exploration of Conditional Privacy Preserving and Authentication Protocols for Internet of Vehicles
Neha Bagga, Sheetal Kalra, Sartaj Singh, and Vinit Grewal
14. Solutions of Blockchain and Artificial Intelligence for 5G-Internet of Things in Agriculture
Isaac Oluwafemi Elesemoyo, Oyeyemi Temitayo Oyewole, Adekemi Joanne Olowu, Julius Olasunmibo Ogunniyi, and Favour Oluchi Boi
15. Smart Travelling Bag: Leveraging Blockchain for Enhanced Travel Security and Efficiency with 5G Technology
Detroja Heli, Thakkar Mansi, Ayushi Shah, Keyaba Gohil, Rajesh Gupta, and Sudeep Tanwar
16. Transformation of Financial and Virtual Realms in the Metaverse: A Blockchain Technology Perspective
Sheetal Sharma, Rushina Singhi, Kiran Jindal, and Vijit Chaturvedi

River Publishers Series in Digital Security and Forensics

ISBN: 9788743809043
e-ISBN: 9788743809036
Available From: July 2026
Price: $ 140.00

KEYWORDS:
Blockchain technology, 5G communication, Internet of Things, decentralized architecture, data security, privacy preservation, artificial intelligence, zero trust and zero touch networks, internet of vehicles (IoV), smart agriculture, environmental monitoring, secure identity management, VPN security, cloud security, sustainability, metaverse security, 5G-IoT security paradigms, predictive analytics, intelligent communication, integrity, distributed ledger technology (DLT), smart infrastructure.
