

Architecting a Framework for Edge AI Functional and Non-functional Requirements

Editors:

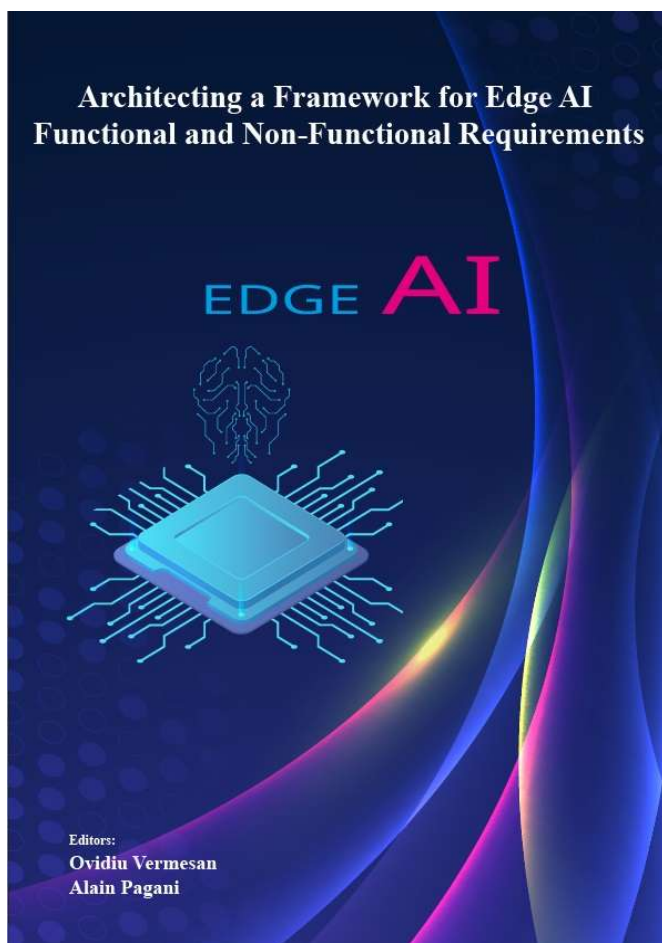

Ovidiu Vermesan, SINTEF, Norway

Alain Pagani, DFKI - German Research Center for Artificial Intelligence, Germany

Architecting a Framework for Edge AI Functional and Non-functional Requirements explores performance, dependability, and trust in edge AI. Covering hardware, software, ethics, law, and KPIs, it offers a holistic framework for building reliable, transparent, and socially aligned edge intelligence systems.

TABLE OF CONTENTS

- Introduction and Background
-
- Taxonomy and Terminology
- Edge AI System Engineering
- Edge AI Non-functional Requirements
- Edge AI Functional Requirements
- Legal Requirements for Design and Development of Edge AI Systems
- Standards
- Conclusion

River Publishers Series in Communications and Networking

ISBN: 9788743809579

e-ISBN: 9788743809562

Available From: March 2026
