

Introduction to Analog and Digital Communication

Authors:

M. A. Bhagyaveni, Anna University, Dept. of ECE, College of Engineering, Guindy, Chennai, India

R. Kalidoss, Dept. of ECE, SSN College of Engineering, Chennai, India

K. S. Vishvakshenan, Dept. of ECE, SSN College of Engineering, Chennai, India

This book primarily focuses on the *design of analog and digital communication systems*; and has been structured to cater to the second year engineering undergraduate students of Computer Science, Information Technology, Electrical Engineering and Electronics and Communication departments. For better understanding, the basics of *analog communication systems* are outlined before the *digital communication systems section*. The content of this book is also suitable for the students with little knowledge in communication systems. The book is divided into five modules for efficient presentation, and it provides numerous examples and illustrations for the detailed understanding of the subject, in a thorough manner.

Technical topics discussed in the book include:

- Analog modulation techniques-AM, FM and PM
- Digital modulation techniques-ASK, PSK, FSK, QPSK, MSK and M-ary modulation
- Pulse modulation techniques and Data communication
- Source coding techniques-Shannon Fano and Huffman coding; channel coding techniques-Linear block codes and convolutional codes
- Advanced communication techniques topics includes-Cellular communication, Satellite communication and multiple access schemes.

River Publishers Series in Communications and Networking

ISBN: 9788793379336

e-ISBN: 9788793379329

Available From: March 2016

Price: € 85.00

KEYWORDS:

Analog communications, digital communications, communication systems, analog modulation, digital modulation, pulse modulation, data communication, wireless communication
