River Publishers

Manual for Intelligent Energy Services

Author: Shirley J. Hansen

This book is dedicated to the front line manager of America's economic life blood: energy. It is designed to help owners and managers first assess their organization's energy conditions, and then determine the best outsourcing strategies for needed services. The author shares experiences drawn from over 25 years in the energy business and work in over 30 countries, and provides succinct case studies to expand on important points raised and to provide insight into their application. The final section takes into account recent events which have highlighted the unpredictable situation surrounding our energy supplies, as well as how to make the most of it.
